

InstaBlanc Face Whitening Milk

Product Summary: InstaBlanc is a must-have product for women who want skin-whitening benefits and achieve luminous glowing skin. It contains whitening ingredients to target the appearance of hyperpigmentation. Moreover, it is versatile and complements any daily skin care regime because you can use it anytime, on face and as often as needed. This quick-acting, quick-absorbing visibly whitening milk is a demonstrable product with instant results that you will love to share with others!

Key Ingredients:

- Mica and Titanium Dioxide – These ingredients visibly cover discoloration on the skin creating an instant whitening effect.
- Niacinamide – visibly targets a key component of uneven skin tone.
- Bisabolol – soothes the skin and protects against environmental stressors like sun exposure and pollution, which can lead to uneven skin tone.
- Glycerin - attracts and bonds moisture to the skin for lasting hydration.

Directions for use: Shake well before use. Apply as much milk as desired to dry, exfoliated skin for instant and even whitening. Avoid eyebrows, hairline and delicate eye area. Use anytime and as often needed. Wash hands thoroughly after application. Wait a few minutes to ensure InstaBlanc is completely dry before dressing.

FAQs

1. WHERE DOES INSTABLANC FIT IN MY SKIN CARE ROUTINE?

Apply InstaBlanc on your face after moisturizer, just before applying sunblock and makeup
Cleanse > Tone > Serum > Moisturiser > InstaBlanc > Sunblock > Makeup

2. CAN INSTABLANC BE USED ON BOTH FACE AND BODY?

InstaBlanc was developed for use on face but is also suitable for use on body. It can be used to combat the appearance of uneven skin tone on desired areas of concern.

3. WHICH SKIN TYPES ARE SUITED TO USE INSTABLANC?

InstaBlanc is formulated for all skin types; however, people with sensitive skin should test the product before use. Do not use on open wounds, eczema, and other skin irritations. Stop use immediately and approach dermatologist if experiencing red spots, swelling, itchiness, and other skin irritation.

4. DO I STILL NEED TO USE A SUNSCREEN IF USING INSTABLANC?

Yes, you should always use a sunscreen product that protects against UVA and UVB rays. InstaBlanc does not come with sunscreen functions and SPF protection. We recommend complementing with our Sunright 35 to protect your skin from sun damage.

5. WHEN SHOULD I APPLY MAKEUP WHEN USING INSTABLANC?

InstaBlanc should be applied before sunblock and makeup.

If you need to reapply InstaBlanc (before touching up makeup), dispense a pea-sized amount of product, spread evenly across fingertips and gently pat InstaBlanc on to skin until fully absorbed. Touch up your makeup as needed.

6. HOW OFTEN SHOULD I REAPPLY INSTABLANC?

You may reapply InstaBlanc as often as needed for instant whiter and glowing skin.

7. IS INSTABLANC SAFE FOR USE DURING PREGNANCY?

As a topically applied product InstaBlanc is generally safe for use. Do however check with your gynaecologist for specific details.

8. CAN INSTABLANC BE USED WITH WHITENING PRODUCTS?

Yes, InstaBlanc is the perfect add-on to any skin care regime. It should be use after Moisturizer before sunblock.

9. DOES INSTABLANC PERMANENTLY WHITEN SKIN OVERTIME OR TEMPORARILY?

InstaBlanc provides both instant and long-term whitening benefits.
